Subject: RE: EcoRebate Rejection - Request for Review

Jennifer,

I reviewed the original assessment. The rejection was correct. The client is confusing our program categories:

- EcoRebate **Tier 2** requires 25% **ENERGY** reduction (electricity/gas)
- The client achieved 28% **WATER** reduction

Water savings fall under our **WaterSaver Program**, not EcoRebate. The WaterSaver threshold is 35% reduction minimum.

At 28% water reduction, they fall short of WaterSaver eligibility by 7%.

Rejection stands. You can explain the distinction and inform them they can reapply if they achieve additional water savings to reach the 35% threshold.

Subject: FW: EcoRebate Rejection - Request for Review

Hi Dr. Goh,

Contractor is appealing the rejection of their EcoRebate application (ER-2024-0152). They claim 28% water reduction should qualify for Tier 2.

Could you review the original assessment? I want to make sure we didn't miss anything.

Thanks, Jennifer

Subject: EcoRebate Rejection - Request for Review

Dear Jennifer,

I'm very disappointed with the rejection of our EcoRebate application (Ref: ER-2024-0152). We invested \$38,000 in water-saving fixtures and achieved 28% water consumption reduction, but you said it doesn't qualify.

I don't understand why. The program says 25% reduction qualifies for Tier 2. We exceeded that. Can you please review this decision?
