Subject: Kelang Baru — DHC Inspection Findings Detail

Nurul, Priya,

I've now received the detailed findings from DHC's 9 May inspection. Key points:

DHC interviewed 6 workers on site. Two workers reported incidents that do not appear in our records:

A worker reported being struck by a swinging load during lifting operations on or around 8 Dec 2025, resulting in bruising to his shoulder and 2 days of light duties. No incident report on file with HCSA.

A worker reported a near-collapse of a scaffold platform on approximately 5 Feb 2026, which required emergency evacuation of 4 workers. No incident report on file with HCSA.

DHC observed that the daily site inspection checklist (Document DSI-CS-90) for 9 May 2026 had already been marked as completed and signed at 6:45 AM — 15 minutes before the mandated 7:00 AM inspection time. DHC considers this evidence of falsified inspection records.

DHC noted that Kelang Baru's PTW-LO-86 (Lifting Operations permit, Ref: LO-2026-0034) listed an expiry date of 2 May 2026, but lifting operations were observed on 9 May 2026 with no renewed permit on file.

DHC has given us 14 days to respond with a remediation plan. I'll need both of you in a meeting tomorrow to discuss next steps.

Vincent
