Subject: RE: RE: Kelang Baru — DHC Escalation Notice Received

Vincent,

I've compiled the file as requested. Attached is the consolidated record for Kelang Baru at Tanjung Pagar Waterfront Residences. Summary of key items:

Permit violations: Two confirmed instances of work continuing beyond permit expiry — WAH-2026-0041 (expired 12 Feb 2026, work observed on 14 Feb) and WAH-2026-0071 (expired 28 Apr 2026, work observed on 30 Apr). In both cases the contractor renewed the permit after being notified, and I logged these as minor violations under SOP-CO-003 Section 4.3 with 24-hour corrective action windows.

Incident reports on file: Three incidents reported by the contractor:

IR-2025-1184 (3 Nov 2025): Worker struck by falling debris, treated on site with first aid. Classified Level 5.

IR-2026-0203 (19 Jan 2026): Worker fell from scaffolding (approx. 1.5m), complained of back pain, sent home. Classified Level 5.

IR-2026-0512 (22 Mar 2026): Worker's harness caught on protruding rebar during descent, worker suspended for approx. 10 minutes before rescue. No visible injury. Classified Level 5.

Quarterly safety assessments: Q4 2025 score was 68/100, Q1 2026 score was 71/100. I flagged the Q4 score verbally to Mr Faizal Osman during the Q1 assessment visit but did not issue a formal notice at the time as the Q1 score had improved above the threshold.

Toolbox talk records: Contractor has been consistently late in providing these. I have noted this in my weekly reports but have not escalated formally.

I acknowledge that some of these items probably warranted stronger action earlier. Happy to discuss.

Nurul

Subject: RE: RE: Kelang Baru — DHC Escalation Notice Received

Nurul,

We've received a formal escalation notice from the Department of Human Capital (DHC) regarding Kelang Baru Construction Pte Ltd at the Tanjung Pagar Waterfront Residences site. DHC conducted an unannounced inspection on 9 May 2026 and identified what they describe as "systemic safety management failures" including evidence of unreported incidents and permit irregularities.

I need you to pull together the complete file on this contractor at this site — every incident report, permit record, inspection finding, quarterly assessment, and any correspondence. Director Naidu has asked for a full briefing by end of week.

This is serious. Please treat it as priority.

Vincent Loh
