Subject: RE: Incident Report IR-2026-0203 — Worker Fall from Scaffolding

Dear Ms Nurul,

Thank you for your query. To clarify, the worker Mr Suresh Arumugam did not require medical treatment beyond basic first aid administered on site. He experienced some discomfort in his lower back and was allowed to go home to rest as a precaution. He returned to full duties the following day. We have classified this as a Level 5 near-miss/minor first aid incident per POL-CO-003 Section 5.1.

We do not believe further investigation is warranted given the minor nature of the incident.

Best regards,

Rizwan Halid

Subject: RE: Incident Report IR-2026-0203 — Worker Fall from Scaffolding

Dear Mr Rizwan,

I have received Incident Report IR-2026-0203 regarding the worker fall from scaffolding on 19 January 2026. I note that the report states the worker fell approximately 1.5 metres and complained of back pain, and was subsequently sent home.

Could you please confirm whether the worker received any medical treatment beyond first aid, and whether he has returned to full duties? I want to ensure the severity classification is appropriate before I close this out.

Thank you.

Regards,

Nurul Aisyah bte Kadir
