Subject: RE: Tanjung Gateway — Exception Request for Renewable Energy Requirement

Dear Mr Teo,

Thank you for your email. We appreciate HCSA's willingness to consider our situation.

To clarify, we believe the 15% energy improvement threshold under POL-UD-002 Section 2.1 (Tier 1, projects under \$10M) is the applicable benchmark for Tanjung Gateway. Our exception request under Form EX-04 is specifically to reduce the renewable energy contribution from 15% to 12% of annual energy consumption, on the basis of economic hardship as permitted under POL-UD-002 Section 8.1.

We have engaged our cost consultant to prepare the supporting documentation. We trust this can be resolved efficiently.

Best regards,

Faizal Hamid

Subject: RE: Tanjung Gateway — Exception Request for Renewable Energy Requirement

Dear Mr Hamid,

Thank you for submitting your exception request dated 28 April 2026 via Form EX-04 for the Tanjung Gateway project.

I have reviewed the submission and note that the project value of \$9.8M places it within Tier 1 under POL-UD-002 Section 2.1. I understand your position regarding the renewable energy cost pressures and will process the request accordingly.

Could you please provide the detailed cost-benefit analysis and evidence of economic hardship as required under the exception procedure? Once received, I will advance the request through the approval workflow per POL-UD-002 Section 8.2.

Regards,

Raymond Teo

Project Manager | Development Projects Division | HCSA

Subject: Tanjung Gateway — Exception Request for Renewable Energy Requirement

Dear Mr Teo,

We are writing to formally submit an exception request under POL-UD-002 Section 8.1 for the Tanjung Gateway commercial development (Contract Ref: TG-2025-0041).

As you are aware, the project has a contract value of \$9.8 million and a gross floor area of 7,200 sqm. Due to significant increases in photovoltaic panel supply costs and site constraints limiting rooftop installation area, we are requesting a reduction in the renewable energy requirement from 15% to 12% of annual energy consumption.

We believe this constitutes a legitimate basis for exception under the economic hardship provision. We will provide supporting cost documentation upon your request.

Best regards,

Faizal Hamid
