Subject: RE: Tanjung Gateway — Updated Renewable Energy Threshold and Exception Request Status

Dear Mr Teo,

We acknowledge receipt of your email dated 22 May 2026. We note the revised position regarding the 20% renewable energy threshold under POL-UD-002 Section 2.2.

However, we respectfully submit that the project was tendered and awarded on the understanding that the 15% figure applied. Our cost planning, subcontractor procurement, and photovoltaic system design were all based on this figure, which was not challenged during the pre-design sustainability workshop (held 12 January 2026) or at the Stage 1 Preliminary Assessment gateway review.

We intend to maintain our exception request but will revise Form EX-04 to reflect the 20% baseline. We will seek a reduction to 15% on grounds of economic hardship and client-mandated constraints. We expect to submit the revised form within 10 business days.

Best regards,

Faizal Hamid

Director of Projects | Cahaya Commercial Builders

Subject: Tanjung Gateway — Updated Renewable Energy Threshold and Exception Request Status

Dear Mr Hamid,

Further to our earlier correspondence regarding the Tanjung Gateway exception request (Form EX-04, dated 28 April 2026), I am writing to advise of a correction to the applicable renewable energy threshold for this project.

Upon internal review, it has been determined that the mandatory renewable energy requirement for Tanjung Gateway is governed by POL-UD-002 Section 2.2, which requires all commercial projects exceeding 5,000 sqm GFA to derive a minimum of 20% of annual energy from renewable sources. The project's GFA of 7,200 sqm triggers this provision. The 15% figure referenced in your exception request and in earlier project documentation relates to the Tier 1 energy efficiency improvement requirement under Section 2.1, which is a separate obligation.

Accordingly, the current exception request — which seeks a reduction from 15% to 12% — is framed against an incorrect baseline. Should you wish to proceed with an exception, the request must be resubmitted against the 20% mandatory minimum, with updated supporting documentation.

I apologise for any confusion arising from our earlier correspondence. Please do not hesitate to contact me if you require clarification.

Regards,

Raymond Teo
