Subject: RE: FW: Safety prequalification - our company score

Rachel,

Thank you for flagging this. Based on the information provided in the case, I confirm your interpretation is correct — the score as stated places the contractor below the minimum threshold under our current policy. There is no discretionary override mechanism at the officer level.

Their track record is noted but cannot substitute for the assessment score. You may advise them to address gaps and resubmit the CSA-72. A resubmission is acceptable after a 30-day remediation period.

On enhanced supervision — that is not applicable here as they do not meet the 70 threshold. Enhanced supervision is an internal cost borne by HCSA. It is not charged to the contractor.

Please respond to the client accordingly.

Subject: FW: Safety prequalification - our company score

Hi Catherine,

Please see below. The contractor is asking about their eligibility based on the score from the attached assessment. Their figure falls just under our minimum threshold.

Per Section 7.1 of the policy, contractors below 70 are ineligible, and scores 70–79 require enhanced supervision. As the score is 68, I believe they would be ineligible. However, given they mentioned 12 years without a fatality, wanted to check if there is any discretion or exception process we can apply here.

Also they are asking whether enhanced supervision carries additional cost to them — could you advise?

Subject: Safety prequalification - our company score

Hi,

We are applying to be contractor for HCSA project in Pulau Ulu. We did the safety assessment form (CSA-72 i think?) last week and our coordinator told us we got 68/100.

Can we still work with you? We have very good track record pls check. We been in business 12 years no fatality.

Also if got enhanced supervision what does that mean exactly? Is extra cost to us?

Rgds
