Subject: RE: PTW-WAH-84 Permit Approved — Project UP-2025-088 (Bukit Lintang Residential Complex Phase 2)

Dear Mr Ahmad,

Thank you for your complete and timely submission. I am pleased to confirm that the Working at Height Permit (Permit ID: PER-2025-267) for Project UP-2025-088 — Bukit Lintang Residential Complex Phase 2 has been approved.

Permit Details:

- Permit Type: PTW-WAH-84 (Working at Height)
- Permit Validity: 7 days (12 May 2025 to 19 May 2025), per SOP-CO-003 Section 3.1
- Conditions Imposed: 3
 1. All personnel working above 2 metres must be equipped with full-body harnesses inspected within the last 6 months.
 2. A dedicated safety supervisor must be present on-site at all times during height work activities.
 3. Daily toolbox talks must specifically address fall prevention hazards, in accordance with SOP-CO-003 Section 2.1.

All three conditions are noted as met based on your submitted documentation and the pre-construction safety inspection (INS-2025-310) conducted on 8 May 2025, which returned a Pass result with zero defects.

The processing fee of SGD 500 has been received and recorded.

Please ensure that any renewal application is submitted at least 1 working day prior to expiry, per SOP-CO-003 Section 3.2. Should the scope of height work change materially, a new permit application will be required.

Best regards,

Lim Wei Ting

Senior Safety Officer

Construction Operations Division, HCSA

Subject: RE: PTW-WAH-84 Permit Application — Project UP-2025-088 (Bukit Lintang Residential Complex Phase 2)

Dear Mr Lim,

Thank you for acknowledging receipt of our application. As requested, please find attached the following supporting documents:

1. Completed PTW-WAH-84 application form
2. Risk assessment report for façade installation works (Levels 5–12)
3. Harness inspection certificates for all 14 personnel assigned to height work
4. Safety supervisor credentials — Mr Tan Kah Hock (HCSA-certified, Cert No. HSC-2023-0892)
5. Copy of pre-construction safety inspection report (INS-2025-310, dated 8 May 2025) — Pass result, zero defects

We confirm that daily toolbox talks addressing fall prevention have been incorporated into our site programme effective 10 May 2025, in compliance with SOP-CO-003 Section 2.1 (minimum 15 minutes, within 30 minutes of shift start).

Our contractor safety prequalification score under Document CSA-72 was 88/100 at last assessment, well above the minimum threshold of 70/100 as required by POL-CO-003 Section 7.1.

We appreciate your team's guidance and look forward to your approval.

Best regards,
Ahmad Razali

Subject: RE: PTW-WAH-84 Permit Application — Project UP-2025-088 (Bukit Lintang Residential Complex Phase 2)

Dear Mr Ahmad,

I acknowledge receipt of your permit application for Working at Height activities at Project UP-2025-088. Per SOP-CO-003 Section 3.2, the standard processing timeline applies — applications must be submitted at least 1 working day prior to the intended commencement of works. Your application dated 8 May 2025 for works commencing 12 May 2025 satisfies this requirement.

I note that the pre-construction safety inspection (INS-2025-310) was completed today with a Pass result and zero defects found. This is a positive indicator.

Before I can proceed with approval, please confirm the following:

1. All harness inspection certificates are current (inspected within the last 6 months).
2. The designated safety supervisor holds a valid HCSA certification.
3. Your daily toolbox talk programme has been updated to include fall prevention topics as per SOP-CO-003 Section 2.1.

Please submit the supporting documents at your earliest convenience.

Best regards,
Lim Wei Ting

Subject: PTW-WAH-84 Permit Application — Project UP-2025-088 (Bukit Lintang Residential Complex Phase 2)

Dear Mr Lim,

I am writing to submit a permit application under PTW-WAH-84 (Working at Height) for Project UP-2025-088 — Bukit Lintang Residential Complex Phase 2, managed by Tanjong Pagar Construction Pte Ltd (CONTR-2023-041).

We are scheduled to commence façade installation works on Levels 5 through 12 from 12 May 2025. In accordance with SOP-CO-003 Section 3.1, we understand that the PTW-WAH-84 permit carries a validity of 7 days.

A pre-construction safety inspection is being conducted today (8 May 2025) by Pulau Safety Consultants Pte Ltd. We will share the inspection report upon completion.

Please advise on any additional documentation required for the application.

Best regards,

Ahmad Razali
