Subject: RE: Outcome of Quarterly Contractor Performance Review — CONTR-2022-047

Dear Mr Rajan,

Thank you for your letter dated 9 March 2026 and for attending the Performance Review Board hearing on 2 March 2026.

I write to formally confirm the Board's decision. After reviewing the aggregated performance data across all five completed projects assigned to Pulau Ulu Building Works Pte Ltd (CONTR-2022-047), the Board has determined that your company's engagement status will be changed from Active to **Suspended**, effective 16 March 2026.

This decision was reached on the following grounds:

1. Your company's quarterly safety assessment score for Q4 2025 was recorded at **58/100**, which falls below the minimum threshold of 70/100 stipulated under POL-CO-003 Section 7.3. This is the third consecutive quarter in which your score has fallen below this threshold (Q2 2025: 62/100; Q3 2025: 55/100; Q4 2025: 58/100).
2. The aggregated inspection record across all projects showed a failure rate exceeding 60%, with a total of 56 defects identified across 14 inspections. While all rectifications were eventually completed, several were completed after the stipulated deadlines — notably INS-2025-034, where the rectification deadline of 2 April 2025 was missed by 12 days.
3. All five completed projects exhibited both cost overruns and schedule delays. The Board noted an average cost overrun exceeding 16% and an average schedule delay exceeding 100 days.
4. Permit condition compliance was also below expectations. Across five permits, a total of 31 conditions were imposed and only 24 were met, representing a compliance rate of 77.4%.

Under POL-CO-003 Section 7.3, the suspension will remain in effect until your company can demonstrate sustained improvement. Any future re-engagement will require a fresh prequalification assessment using Document CSA-72 per POL-CO-003 Section 7.1, with a minimum safety score of 70/100.

I also note for the record that your company submitted an updated corrective action register (Document CAR-100) on 20 February 2026, as required under SOP-CO-003 Section 7.1. The HSE team has acknowledged receipt and will review it as part of any future reinstatement assessment.

Regards,
Mdm Lim Siew Hoon
Senior Contract Manager
Housing, Construction and Sustainability Authority

Subject: RE: Outcome of Quarterly Contractor Performance Review — CONTR-2022-047

Dear Mdm Lim,

Thank you for the opportunity to present our case at the Performance Review Board hearing on 2 March 2026. We acknowledge the concerns raised regarding our inspection failure rate, cost overruns, and schedule delays across our project portfolio.

We wish to highlight that all rectification items across all projects have now been completed, including the final rectification for UP-2024-110 which was closed out on 14 October 2025. The final structural inspection for UP-2024-110 (INS-2026-004, 20 January 2026) resulted in a pass with only 1 defect noted and no rectification required.

We have also submitted our updated corrective action register (Document CAR-100) on 20 February 2026 and have engaged an external safety consultant to review our internal safety management systems.

We understand that the Board's decision will be guided by the aggregated performance data and the requirements of POL-CO-003 Section 7.3. We respectfully request that any suspension be accompanied by clear reinstatement criteria so that we may work towards meeting them.

Regards,
Mr Rajan Krishnamurthy
Director
Pulau Ulu Building Works Pte Ltd

Subject: Outcome of Quarterly Contractor Performance Review — CONTR-2022-047

Dear Mr Rajan,

Further to the quarterly safety assessments conducted for Pulau Ulu Building Works Pte Ltd (CONTR-2022-047) over the past three quarters, I write to inform you that the Performance Review Board has scheduled a formal hearing on **2 March 2026** to review your company's aggregated performance record.

As you are aware, your quarterly safety assessment scores for Q2 2025 (62/100), Q3 2025 (55/100), and Q4 2025 (58/100) have each fallen below the minimum threshold of 70/100 required under POL-CO-003 Section 7.3. Under this provision, HCSA may proceed with suspension or termination of your engagement.

The Board will consider the full aggregated record across all projects assigned to CONTR-2022-047, including inspection outcomes, cost and schedule performance, and permit condition compliance. Please attend the hearing prepared to present any mitigating factors or corrective measures your company has undertaken.

Please also ensure that your corrective action register (Document CAR-100, per SOP-CO-003 Section 7.1) is up to date and submitted to the HSE team no later than 24 February 2026.

Regards,
Mdm Lim Siew Hoon
