Nurul,

Thanks for flagging. I share your concern but I'm not sure what we can do at this stage if the quarterly score is still above 70. POL-CO-003 Section 7.3 is quite clear — the suspension/termination trigger is the score threshold. We don't have a formal watch-list or enhanced monitoring mechanism for contractors that are trending down but haven't breached.

I'd suggest you keep a close eye on the Q4 assessment and document everything. If they dip below 70, we can act immediately. In the meantime, continue the normal inspection and permit compliance process.

I know you've got a lot on your plate with the Pasir Panjang file as well. Let me know if you need to redistribute any of your caseload.

Vincent

Subject: Concerns re Buana Teguh (CONTR-2023-041) — Declining Performance Trend

Vincent,

I wanted to flag something that's been bothering me about Buana Teguh (CONTR-2023-041). They currently have two active projects — UP-2025-012 and UP-2025-058 — and I'm seeing a clear downward trend in their safety performance across both.

On UP-2025-012, the September safety compliance inspection (INS-2025-112) came back as Fail with 7 defects. Their earlier inspection in June (INS-2025-078) was a Conditional Pass with 4 defects. On UP-2025-058, the structural inspection on 20 October (INS-2025-130) just came back as Conditional Pass with 5 defects — up from 2 defects in July (INS-2025-061).

I also note that on UP-2025-012, the Lifting Operations permit PER-2025-091 had 7 conditions imposed but only 3 met before expiry. Their Hot Work permit PER-2025-067 also had an unmet condition.

Their Q2 2025 quarterly safety score was 78 and the Q3 score just came in at 72. Still above the 70 threshold under POL-CO-003 Section 7.3, but the trajectory is concerning. Combined with the cost overrun on their completed project UP-2024-035 (SGD 9.14M actual vs SGD 8.2M estimated), I'm worried they may be under financial pressure that's affecting their safety capacity.

Is there anything in the policy framework that allows us to place a contractor on enhanced monitoring or a watch-list before they formally breach the 70-point threshold? I couldn't find anything in POL-CO-003 Section 7 that covers this scenario.

I'd appreciate your guidance. I'm juggling the Pasir Panjang resettlement file and three other active contractor reviews so I want to make sure I'm not missing something.

Nurul
